

7) 1) Types of mediums ?

- * Radio frequency
- * Electrical signal
- * Light signal

2) write down switch 8 - pins ?

- 1 +R
- 2 -R
- 3 +T
- 4 +V
- 5 -V
- 6 -T
- 7 -
- 8 -

3) Connect utp cable between two devices

4) Explain Auto MDIX?

In some NIC (Network Interface Card) it have a function called Auto MDIX. If these function available in NIC, we can use straight connection cable for same machines like PC to PC etc. It will automatically change the connection by the Data flow by the function of Auto MDIX in NIC.

5) Explain PoE Injector?

6) Explain PoE switch?

PoE switch means to support the power over Ethernet in the UTP cable, not all cable do this function, only PoE switch which support to allow the power to pass in the UTP cable. By using PoE switch, it reduces the use of separate cable for power.

7) Explain types of NIC & function?

Types of Network Interface Card

- i) Wired (ethernet, fibre)
- ii) Wireless. (Radio frequency)

Function.

It is used convert Binary signals to electrical signals and electrical signals to Binary signals. Outside the PC it transfers data in electrical signals.
